AD DESIGN + CONSULTING

Progressive engineering

AD Design & Consulting (ADDC) is a consultancy offering a diverse range of services in civil infrastructure, urban development and renewable energy. Our business is Tasmanian owned and operated. We deliver value added solutions and have extensive project experience across Tasmania.

Our services are well suited to infrastructure projects undertaken in conjunction with our client, our team can integrate and adapt to any specific requirement and project needs. ADDC have an excellent understanding of the Tasmanian, Queensland and New South Wales markets and extensive experience in dealing with local and state authorities throughout numerous projects that we have successfully delivered over the past 8 years.

We put strong emphasis on providing cost effective engineering solutions and meeting client deadlines without compromising on safety or quality. We have consistently demonstrated the ability to offer cost saving solutions by working proactively with clients, stakeholders and governing bodies, starting at the concept development stage through to design and final project delivery.

Engineering Markets

ADDC provides a comprehensive range of services from preliminary investigation to managing detail design, project award and construction of multi-discipline projects. We pride ourselves on ensuring all of our clients' requirements and expectations are not only met efficiently but also exceeded throughout all stages of the project.

Our core capabilities are:

- > Project Management & Delivery;
- > Civil Infrastructure & Development;
- > Stormwater Management & WSUD;
- > Property Development;
- > Traffic/Transportation; and
- > Surveying & Spatial Solutions.

We operate and collaborate with a diverse range of qualified consultants with specific skill sets and thus we always have back up resources, if and where required throughout any project. All consultants are experienced professionals managed in-house by ADDC.
